

# 分数のたし算ひき算10

(分数と小数の計算)

年 組 名前( )

次の計算をしましょう。

(1)  $\frac{1}{2} + 0.25$

(9)  $\frac{1}{3} - 0.3$

(2)  $\frac{2}{3} + 0.7$

(10)  $\frac{2}{3} - 0.4$

(3)  $\frac{1}{4} + 0.3$

(11)  $\frac{4}{7} - 0.5$

(4)  $\frac{1}{8} + 0.4$

(12)  $\frac{2}{3} - 0.6$

(5)  $0.9 + \frac{1}{3}$

(13)  $0.7 - \frac{4}{7}$

(6)  $0.8 + \frac{3}{8}$

(14)  $0.8 - \frac{5}{7}$

(7)  $0.75 + \frac{1}{8}$

(15)  $0.9 - \frac{4}{7}$

(8)  $0.2 + \frac{4}{9}$

(16)  $0.75 - \frac{4}{7}$

# 分数のたし算ひき算10

次の計算をしましょう。

$$(1) \frac{1}{2} + 0.25 = \frac{1}{2} + \frac{1}{4} \\ = \frac{2}{4} + \frac{1}{4} = \frac{3}{4}$$

$$(9) \frac{1}{3} - 0.3 = \frac{1}{3} - \frac{3}{10} \\ = \frac{10}{30} - \frac{9}{30} = \frac{1}{30}$$

$$(2) \frac{2}{3} + 0.7 = \frac{2}{3} + \frac{7}{10} \\ = \frac{20}{30} + \frac{21}{30} = \frac{41}{30}$$

$$(10) \frac{2}{3} - 0.4 = \frac{2}{3} - \frac{2}{5} \\ = \frac{10}{15} - \frac{6}{15} = \frac{4}{15}$$

$$(3) \frac{1}{4} + 0.3 = \frac{1}{4} + \frac{3}{10} \\ = \frac{5}{20} + \frac{6}{20} = \frac{11}{20}$$

$$(11) \frac{4}{7} - 0.5 = \frac{4}{7} - \frac{1}{2} \\ = \frac{8}{14} - \frac{7}{14} = \frac{1}{14}$$

$$(4) \frac{1}{8} + 0.4 = \frac{1}{8} + \frac{2}{5} \\ = \frac{5}{40} + \frac{16}{40} = \frac{21}{40}$$

$$(12) \frac{2}{3} - 0.6 = \frac{2}{3} - \frac{3}{5} \\ = \frac{10}{15} - \frac{9}{15} = \frac{1}{15}$$

$$(5) 0.9 + \frac{1}{3} = \frac{9}{10} + \frac{1}{3} \\ = \frac{27}{30} + \frac{10}{30} = \frac{37}{30}$$

$$(13) 0.7 - \frac{4}{7} = \frac{7}{10} - \frac{4}{7} \\ = \frac{49}{70} - \frac{40}{70} = \frac{9}{70}$$

$$(6) 0.8 + \frac{3}{8} = \frac{4}{5} + \frac{3}{8} \\ = \frac{32}{40} + \frac{15}{40} = \frac{47}{40}$$

$$(14) 0.8 - \frac{5}{7} = \frac{4}{5} - \frac{5}{7} \\ = \frac{28}{35} - \frac{25}{35} = \frac{3}{35}$$

$$(7) 0.75 + \frac{1}{8} = \frac{3}{4} + \frac{1}{8} \\ = \frac{6}{8} + \frac{1}{8} = \frac{7}{8}$$

$$(15) 0.9 - \frac{4}{7} = \frac{9}{10} - \frac{4}{7} \\ = \frac{63}{70} - \frac{40}{70} = \frac{23}{70}$$

$$(8) 0.2 + \frac{4}{9} = \frac{1}{5} + \frac{4}{9} \\ = \frac{9}{45} + \frac{20}{45} = \frac{29}{45}$$

$$(16) 0.75 - \frac{4}{7} = \frac{3}{4} - \frac{4}{7} \\ = \frac{21}{28} - \frac{16}{28} = \frac{5}{28}$$
