

# 分数のたし算ひき算4

(分数と小数の計算)

年 組 名前( )

次の計算をしましょう。

(1)  $\frac{3}{8} + 0.9$

(9)  $\frac{2}{3} - 0.25$

(2)  $\frac{3}{8} + 0.4$

(10)  $\frac{5}{6} - 0.6$

(3)  $\frac{1}{8} + 0.8$

(11)  $\frac{3}{4} - 0.4$

(4)  $\frac{1}{9} + 0.2$

(12)  $\frac{2}{3} - 0.3$

(5)  $0.3 + \frac{4}{9}$

(13)  $0.9 - \frac{3}{4}$

(6)  $0.5 + \frac{1}{3}$

(14)  $0.2 - \frac{1}{9}$

(7)  $0.6 + \frac{1}{3}$

(15)  $0.8 - \frac{4}{7}$

(8)  $0.75 + \frac{1}{8}$

(16)  $0.7 - \frac{2}{3}$

# 分数のたし算ひき算4

(分数と小数の計算)

次の計算をしましょう。

$$(1) \frac{3}{8} + 0.9 = \frac{3}{8} + \frac{9}{10} \\ = \frac{15}{40} + \frac{36}{40} = \frac{51}{40}$$

$$(9) \frac{2}{3} - 0.25 = \frac{2}{3} - \frac{1}{4} \\ = \frac{8}{12} - \frac{3}{12} = \frac{5}{12}$$

$$(2) \frac{3}{8} + 0.4 = \frac{3}{8} + \frac{2}{5} \\ = \frac{15}{40} + \frac{16}{40} = \frac{31}{40}$$

$$(10) \frac{5}{6} - 0.6 = \frac{5}{6} - \frac{3}{5} \\ = \frac{25}{30} - \frac{18}{30} = \frac{7}{30}$$

$$(3) \frac{1}{8} + 0.8 = \frac{1}{8} + \frac{4}{5} \\ = \frac{5}{40} + \frac{32}{40} = \frac{37}{40}$$

$$(11) \frac{3}{4} - 0.4 = \frac{3}{4} - \frac{2}{5} \\ = \frac{15}{20} - \frac{8}{20} = \frac{7}{20}$$

$$(4) \frac{1}{9} + 0.2 = \frac{1}{9} + \frac{1}{5} \\ = \frac{5}{45} + \frac{9}{45} = \frac{14}{45}$$

$$(12) \frac{2}{3} - 0.3 = \frac{2}{3} - \frac{3}{10} \\ = \frac{20}{30} - \frac{9}{30} = \frac{11}{30}$$

$$(5) 0.3 + \frac{4}{9} = \frac{3}{10} + \frac{4}{9} \\ = \frac{27}{90} + \frac{40}{90} = \frac{67}{90}$$

$$(13) 0.9 - \frac{3}{4} = \frac{9}{10} - \frac{3}{4} \\ = \frac{18}{20} - \frac{15}{20} = \frac{3}{20}$$

$$(6) 0.5 + \frac{1}{3} = \frac{1}{2} + \frac{1}{3} \\ = \frac{3}{6} + \frac{2}{6} = \frac{5}{6}$$

$$(14) 0.2 - \frac{1}{9} = \frac{1}{5} - \frac{1}{9} \\ = \frac{9}{45} - \frac{5}{45} = \frac{4}{45}$$

$$(7) 0.6 + \frac{1}{3} = \frac{3}{5} + \frac{1}{3} \\ = \frac{9}{15} + \frac{5}{15} = \frac{14}{15}$$

$$(15) 0.8 - \frac{4}{7} = \frac{4}{5} - \frac{4}{7} \\ = \frac{28}{35} - \frac{20}{35} = \frac{8}{35}$$

$$(8) 0.75 + \frac{1}{8} = \frac{3}{4} + \frac{1}{8} \\ = \frac{6}{8} + \frac{1}{8} = \frac{7}{8}$$

$$(16) 0.7 - \frac{2}{3} = \frac{7}{10} - \frac{2}{3} \\ = \frac{21}{30} - \frac{20}{30} = \frac{1}{30}$$
