

分数のたし算ひき算7

(分数と小数の計算)

年 組 名前()

次の計算をしましよう。

$$(1) \frac{1}{2} + 0.2$$

$$(9) \frac{1}{2} - 0.2$$

$$(2) \frac{4}{9} + 0.6$$

$$(10) \frac{4}{7} - 0.25$$

$$(3) \frac{1}{2} + 0.25$$

$$(11) \frac{2}{3} - 0.3$$

$$(4) \frac{2}{3} + 0.5$$

$$(12) \frac{2}{3} - 0.6$$

$$(5) 0.7 + \frac{1}{3}$$

$$(13) 0.75 - \frac{2}{3}$$

$$(6) 0.75 + \frac{1}{8}$$

$$(14) 0.2 - \frac{1}{9}$$

$$(7) 0.3 + \frac{1}{8}$$

$$(15) 0.7 - \frac{2}{3}$$

$$(8) 0.8 + \frac{2}{3}$$

$$(16) 0.9 - \frac{5}{7}$$

次の計算をしましよう。

$$(1) \frac{1}{2} + 0.2 = \frac{1}{2} + \frac{1}{5} \\ = \frac{5}{10} + \frac{2}{10} = \frac{7}{10}$$

$$(9) \frac{1}{2} - 0.2 = \frac{1}{2} - \frac{1}{5} \\ = \frac{5}{10} - \frac{2}{10} = \frac{3}{10}$$

$$(2) \frac{4}{9} + 0.6 = \frac{4}{9} + \frac{3}{5} \\ = \frac{20}{45} + \frac{27}{45} = \frac{47}{45}$$

$$(10) \frac{4}{7} - 0.25 = \frac{4}{7} - \frac{1}{4} \\ = \frac{16}{28} - \frac{7}{28} = \frac{9}{28}$$

$$(3) \frac{1}{2} + 0.25 = \frac{1}{2} + \frac{1}{4} \\ = \frac{2}{4} + \frac{1}{4} = \frac{3}{4}$$

$$(11) \frac{2}{3} - 0.3 = \frac{2}{3} - \frac{3}{10} \\ = \frac{20}{30} - \frac{9}{30} = \frac{11}{30}$$

$$(4) \frac{2}{3} + 0.5 = \frac{2}{3} + \frac{1}{2} \\ = \frac{4}{6} + \frac{3}{6} = \frac{7}{6}$$

$$(12) \frac{2}{3} - 0.6 = \frac{2}{3} - \frac{3}{5} \\ = \frac{10}{15} - \frac{9}{15} = \frac{1}{15}$$

$$(5) 0.7 + \frac{1}{3} = \frac{7}{10} + \frac{1}{3} \\ = \frac{21}{30} + \frac{10}{30} = \frac{31}{30}$$

$$(13) 0.75 - \frac{2}{3} = \frac{3}{4} - \frac{2}{3} \\ = \frac{9}{12} - \frac{8}{12} = \frac{1}{12}$$

$$(6) 0.75 + \frac{1}{8} = \frac{3}{4} + \frac{1}{8} \\ = \frac{6}{8} + \frac{1}{8} = \frac{7}{8}$$

$$(14) 0.2 - \frac{1}{9} = \frac{1}{5} - \frac{1}{9} \\ = \frac{9}{45} - \frac{5}{45} = \frac{4}{45}$$

$$(7) 0.3 + \frac{1}{8} = \frac{3}{10} + \frac{1}{8} \\ = \frac{12}{40} + \frac{5}{40} = \frac{17}{40}$$

$$(15) 0.7 - \frac{2}{3} = \frac{7}{10} - \frac{2}{3} \\ = \frac{21}{30} - \frac{20}{30} = \frac{1}{30}$$

$$(8) 0.8 + \frac{2}{3} = \frac{4}{5} + \frac{2}{3} \\ = \frac{12}{15} + \frac{10}{15} = \frac{22}{15}$$

$$(16) 0.9 - \frac{5}{7} = \frac{9}{10} - \frac{5}{7} \\ = \frac{63}{70} - \frac{50}{70} = \frac{13}{70}$$
